ABOUT ME

I am a dedicated and results-oriented Informatics student with a strong passion for continuous learning and growth. I focus on developing web-based applications, particularly in user interface and user experience (UI/UX) design, and have experience in designing and implementing front-end solutions using HTML, CSS, JavaScript, and modern frameworks. Comfortable working both independently and in teams, I adapt quickly to new challenges while maintaining a proactive and solution-oriented mindset.

EDUCATION AND TRAINING

[01/10/2022 – Current]

Bachelor of Informatics

Telkom University Surabaya

City: Surabaya | **Country:** Indonesia | **Field(s) of study:** Informatics | **Level in EQF:** EQF level 6

WORK EXPERIENCE

cmlabs Indonesia Digital

City: Malang | **Country:** Indonesia

[13/01/2025 – 01/05/2025]

Frontend Developer

1. Contributed to the development of an interactive user interface for a web-based plagiarism detection system.
2. Integrated APIs with the backend database to ensure seamless data flow and system functionality.
3. Optimized application performance and enhanced feature accessibility to improve user experience.
4. Implemented responsive design components to ensure optimal usability across various devices.
5. Utilized modern frameworks such as Vue.js to build and maintain scalable front-end components.

Bandung Techno Park (WRAP Entrepreneurship)

City: Surabaya | **Country:** Indonesia

[31/01/2025 – 03/06/2025]

UI/UX Designer

1. Designed the cooperative information system interface based on a user-centered design approach to enhance efficiency and usability.
2. Ensured intuitive navigation, visual consistency, and a professional yet engaging appearance.
3. Conducted user research through interviews and observations to understand workflows and pain points.
4. Created wireframes, mockups, and interactive prototypes using tools such as Figma.
5. Collaborated with developers to ensure design implementation aligned with UX principles and specifications.

PROJECTS

[11/05/2024 – 14/06/2024]

Educational Website (BrainyBuddies)

BrainyBuddies is a web-based learning platform designed to help elementary school students access interactive and engaging educational materials. The platform enables teachers to upload and manage lessons, while students can watch, practice, and review to reinforce their understanding. The project aims to make learning more accessible and enjoyable through digital technology.

My role as a Frontend Developer:

1. Conducted research on learning materials and curriculum alignment for content development.
2. Designed and implemented the website's user interface with a focus on simplicity and accessibility for young learners.
3. Developed the front-end using HTML, CSS, JavaScript, PHP, and MySQL for dynamic content management.
4. Collaborated with the team to optimize performance and ensure a smooth learning experience.

[27/04/2024 – 06/05/2024] **Land Marketplace Platform (Takur.Co)**

Takur.Co is a land marketplace application designed to provide a transparent and efficient platform for buying and selling land. It offers verified land information, including price, location, and legal details, to help users make informed decisions and build trust in land transactions.

My role as a UI/UX Designer:

1. Conducted stakeholder and user needs analysis to define functional and design requirements for the Takur.Co platform.
2. Planned and created UI/UX designs using a user-centered design approach to ensure intuitive and efficient user interactions.
3. Developed the application's information architecture and user flow to enhance navigation and usability.
4. Designed wireframes, mockups, and interactive prototypes to communicate design concepts effectively with the development team

LANGUAGE SKILLS

Mother tongue(s): Indonesia

Other language(s):

English

LISTENING A2 **READING** A2 **WRITING** B1

SPOKEN PRODUCTION A2 **SPOKEN INTERACTION** A2

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

SKILLS

design user interface | implement front-end website design | Microsoft Office: Word, Excel, Powerpoint, Outlook, OneNote | Canva, Figma | CSS and JS Frameworks (e.g., Vue, Bootstrap) | analyse software specifications | PHP, HTML, Javascript and Laravel Framework
